28 January 2014

Dear Ms Bailey

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link:

<http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=166141>

Please contact the office on 0845 5197493 or reports@cfepsurveys.co.uk if you require further information about your report.

Yours sincerely

Helen Powell  
Survey Manager

# Report Contents

## Introduction

### Your patient feedback

Distribution and frequency of ratings (table 1)	P1
Your mean percentage scores and benchmarks from all participating practices (table 2, graph 1)	P2
Your mean percentage scores and benchmarks by practice list size (table 3, graph 2)	P3
Your patient demographics (table 4)	P4
Your current and previous mean percentage scores (table 5)	P5
Your patient comments	P6

Explanation of quartiles
Page by page guide to the interpretation of your report
Sample questionnaire

## Introduction

### About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

### About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

### Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

### Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

Your patient feedback

## Your patient feedback

Table 1: Distribution and frequency of ratings, questions 1-28

Question	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Q1 Opening hours satisfaction	1	7	48	59	28	1
Q2 Telephone access	2	8	38	52	40	4
Q3 Appointment satisfaction	0	7	41	54	40	2
Q4 See practitioner within 48hrs	9	20	40	40	30	5
Q5 See practitioner of choice	2	34	48	34	22	4
Q6 Speak to practitioner on phone	3	15	57	31	21	17
Q7 Comfort of waiting room	0	4	26	63	48	3
Q8 Waiting time	7	21	42	41	24	9
Q9 Satisfaction with visit	1	4	27	43	69	0
Q10 Warmth of greeting	0	3	30	37	70	4
Q11 Ability to listen	3	3	22	40	73	3
Q12 Explanations	1	6	18	47	67	5
Q13 Reassurance	2	5	25	45	62	5
Q14 Confidence in ability	2	3	21	46	71	1
Q15 Express concerns/fears	2	4	23	49	64	2
Q16 Respect shown	2	5	15	47	73	2
Q17 Time for visit	2	3	28	46	62	3
Q18 Consideration	3	2	19	45	70	5
Q19 Concern for patient	2	3	24	44	66	5
Q20 Self care	3	1	29	45	61	5
Q21 Recommendation	3	2	21	45	67	6
Q22 Reception staff	1	2	24	45	70	2
Q23 Respect for privacy/confidentiality	0	2	33	45	60	4
Q24 Information of services	1	8	37	44	49	5
Q25 Complaints/compliments	0	7	44	47	29	17
Q26 Illness prevention	3	14	40	46	34	7
Q27 Reminder systems	0	13	43	42	36	10
Q28 Second opinion / comp medicine	1	6	36	36	31	34

Blank/spoilt responses are not included in the analysis (see score explanation)

-- no data available, question introduced in October 2009.

## Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

## Any comments about how this practice could improve its service?

- Occasionally the telephone information is poorly given for example being told that I have phoned the wrong number for repeat prescriptions (first time, just didn't know).
- I have only just joined this practice so am unable to answer all the questions. Everyone has been very welcoming.
- I am quite happy as it is.
- My only problem with the service is that there is no service at weekends.
- This is an excellent all round practice.
- First class practice. Excellent staff and this doctor is very good. Could not be any better.
- For those working a Saturday appointment system would be greatly appreciated.
- Not really. We consider ourselves lucky to have a practice of this quality.
- Ladies in dispensary could perhaps keep their voices down, so that everybody else does not know what medications you are taking.
- Overall this practice has been a valuable source of support in my personal care and well being.
- Have no complaints about the care this practice gives.
- More availability of routine appointments.
- I am always happy with the service and the other evening my child required treatment at 6pm which the doctor did as a favour just before going home! We were very very grateful as without this it would have been a lot of trauma and a visit to casualty. If we had been 10 minutes later we would not have been seen here. So I do think longer practice hours would be useful in this instance and it would help my partner who often has to take time off work to see doctor.
- Repeat prescriptions. Giving more medicines at one time for chronic illnesses so as not to have to keep coming to surgery (25 mile round trip) to collect prescription.
- Excellent overall and very pro-active in dealing with any query or issue.
- Bunbury Medical Practice is always excellent.
- Regarding question 26 - more preventative action clinics/information.
- The practice is excellent.
- Reception staff amazingly helpful - they seem incredibly busy all the time. More staff?
- We do not feel that the gates should be closed from Friday to Monday!
- Same day - ring for appointment and see the doctor same day not 3 days later. Very poor.
- Q7 refers to waiting room magazines but I notice these seem to have disappeared.
- Time waiting for appointment.
- The telephone response service is inadequate 'all our operators are busy'!
- Opening times to reflect people's work hours would be helpful, Saturday mornings for routine appointments for example (maybe practice nurse?). Health/wellbeing open seminars, say 1/2 yearly open meeting/seminar for alcohol/weight/exercises/diet etc (more anonymous in a crowd for the shy).
- Some magazines would be useful.
- Maybe for the practice to be opened at weekends, so you could see a doctor.
- I cannot identify any weaknesses in the practice's operation.
- All pretty good.

## Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

## Any comments about how this practice could improve its service?

- Very good.
- Switch off the television!
- Administrative arrangements at the practice e.g. referrals being sent promptly etc are poorer than the high quality GP care.
- Telephone manner of some (not all!) staff very poor. Spoken down to and made to feel that I should not ring.
- Better time keeping.
- I have a prescription pre-payment certificate. Sometimes I am asked to present it when collecting my prescription and on others I'm told it's not required as the number is held on record. This caused confusion on one occasion, and a member of the dispensary staff being impolite and abrupt. Clarity by all staff on expectation for patients when using this service would help to avoid such situations in the future.
- Weekend and evening surgeries.

## Any comments about how the doctor/nurse could improve?

- Help and service have been superb.
- Doctor availability at weekends.
- No they are all excellent.
- No improvements necessary.
- Excellent!
- 1st class.
- No. They are all ok.
- This doctor is fantastic! Could not wish for a better GP.
- Weekend opening - everything seems to happen at weekends and evenings!
- None at the moment.
- Only that this doctor does 2 days per week so sometimes is not possible to get appointments. This is not a major issue.
- Listen to patient - I am worried - she might know it's ok but I don't. Incredibly patronising. Become patient friendly.
- No - doctors very good (when you get to see one!).
- Generally, I am well satisfied with the service I receive.
- I have found Bunbury Medical Practice to be excellent for me and the family both at an absolute level and in comparison to others I have attended or anecdotes from friends and family regarding other practices.
- I have complete faith in this doctor whose conduct and professionalism have always been exemplary.
- Make an appointment and always have to wait 15-20 minutes after arriving on time I also have other appointments and it makes me late.
- Hyper.

### Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 144

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	1	7	48	59	28	1

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) + (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100)}{(\text{Total number of patient responses} - \text{number of blank/spoilt})} = \frac{(1 \times 0) + (7 \times 25) + (48 \times 50) + (59 \times 75) + (28 \times 100)}{(144 - 1)} = 9,800/143$$

Your mean percentage score for Q1 = 69%

### Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

Lower quartile, below which lies the lowest 25% of the data

The median, cuts the data set in half

Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	69

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

\*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

## Supporting documents

Page by page guide to the interpretation of your report

### Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

### Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

### Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

### Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

### Page 5

Table 5 lists your current scores for each question together with scores from your last 3 surveys (if applicable) for comparison.

### Page 6

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

# Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
	Survey ID
	Practitioner ID

## You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- All the information provided by patients is put together in a report for the practice. Your answers will not be identifiable. Any comments you make will be included but all attempts will be made to remove information that could identify you.
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this  with a blue or black ball-point pen. If you change your mind just cross out your old response and make your new choice.

**When giving your feedback, please only consider the consultation you have had today.**

### About the practice

	Poor	Fair	Good	Very good	Excellent
1 Your level of satisfaction with the practice's opening hours	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
